Welding Supplies and Safety Equipment*

DALE OXYGEN, INC.

www.daleoxygen.com

The Gas & Welding Experts Since 1939

For over 75 years, Dale Oxygen, Inc. has been serving a vast number of industries reliant on quality welding products and supplies, as well as industrial, medical and research gases. We are a family-owned and operated independent business dedicated to the success of each and every one of our valued customers. Our success over the years is deeply attributed to our ability to remain at the forefront of the industries we serve, remain flexible and to consistently solve our customers' greatest operational challenges.

Dale Oxygen operates from three strategic locations that best serve central and southwest Pennsylvania. Each location boasts an expert staff eager to make sure your operation is taken care of—every time! We appreciate the time you have invested in learning more about our operation. We look forward to earning your trust.

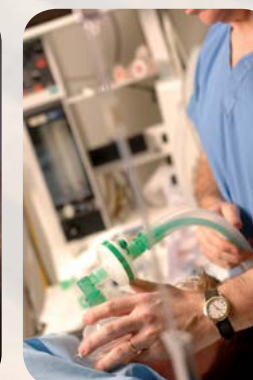

A Proud History – Dale Oxygen, Inc. was founded in 1939 by Harry W. Benneer at the age of 22. Through connections at the Air Reduction Company, Harry became an authorized Airco distributor and opened up for business. The rest is history. Harry began by selling and delivering oxygen and acetylene gas cylinders, oxy-fuel torches and welding electrodes for welding and cutting applications to local businesses.

With continued growth and success, Dale Oxygen outgrew the small shop in Dale and moved to the Cambria City section of Johnstown in 1953. The business increased inventory to meet demand and had three trucks in the distribution fleet. Dale Oxygen never stopped growing, and the business moved for the second time to the Hornerstown section of Johnstown in 1963. This location still serves as the headquarters for Dale

Oxygen, the main cylinder-fill plant facility and is home to a 14,000 square foot warehouse to hold and stock inventory for the entire company.

The year 2014 marked 75 proud years in business for Dale Oxygen and the future remains bright. Starting as a small distributorship in Johnstown, Dale Oxygen has grown into a multifaceted regional leader and provider for many key markets that drive our economy and create job growth. We look forward to fostering the business partnerships we have in place, helping our valued customers grow their businesses, and expanding our team to continue being the best family and independently owned gas and welding distributor in the region.
